EDUCATION

National Chung Cheng University (CCU) Expected Jun. 2027
B.S. in Computer Science and Information Engineering; Minor in Mathematics | Chiayi, Taiwan

- Transferred from Mathematics to CSIE; GPA: **3.49/4.30**.
- **Graduate coursework:** Medical Image Analysis (97/100), Algorithmic Graph Theory, Image Processing.
- **Selected coursework:** Machine Learning (93), Data Mining (93), Software Engineering (95), Systems Programming (96), Discrete Mathematics (96).

RESEARCH EXPERIENCE

360° Multi-Camera Person Re-Identification Oct. 2025 – Present
NSTC Undergraduate Research Project | RockCore Industry Collaboration | Advisor: Prof. Wei-Yang Lin

- Contributed to a real-time multi-camera tracking and ReID pipeline using YOLO, ByteTrack, CLIP-ReID, and cross-camera global identity association.
- Benchmarked OSNet, TransReID, and CLIP-ReID on preliminary data; identified limitations in evaluation-set difficulty and data quality.
- Prepared HOTA ground-truth annotations and analyzed identity-consistency evaluation; explored face/body feature fusion and association trade-offs.

SELECTED PROJECTS

Acute Appendicitis Classification via U-Net CT Segmentation Feb. – Jun. 2025
Graduate Medical Image Analysis Project | MATLAB, 2D U-Net, Dice Loss

- Built the team's **2D U-Net** branch, from CT preprocessing and augmentation to custom Dice-loss training and scan-level classification.
- Improved prediction quality through loss-function changes, healthy-slice sampling, and probability/lesion-area thresholds.
- Achieved **scan-level F1 0.833** on a course-provided 20-patient evaluation set; collaborator's separate nnU-Net branch: 0.667. **Honorable Mention**, CCU College of Science Poster Competition.

CCU Academia – LLM-Powered Interactive NPC System Feb. – Jun. 2025
Programming II Project | Python, Llama 3.2, Ollama, Flask, Unity

- Proposed AI-powered NPCs based on university community discussions; led the AI/data pipeline within a three-person team.
- Integrated web scraping, NPC personality labeling, stateful dialogue, and Flask APIs with a Unity campus RPG.

SELECTED PROJECTS (CONTINUED)

Trustworthy AI Assessment System Sep. 2025 – Jan. 2026

Software Engineering Project | Project Leader, Eight-Member International Team

- Led stakeholder requirement clarification, task allocation, scheduling, integration, and project presentations for an 11-indicator AI assessment platform.
- Contributed to questionnaire content, LLM-assisted report generation, PDF testing, and deployment integration.

INDUSTRY EXPERIENCE

RockCore Technology Mar. – Jul. 2026

Industry Intern | MOEA Talent Program; Supervised by EOSL, ITRI

- Evaluated novel-view generation methods (Zero-1-to-3, Zero123++, SyncDreamer), documenting preprocessing, resource requirements, and multi-view quality.
- Supported computer-vision dataset annotation and categorization for company projects.

LEADERSHIP & ACADEMIC ACTIVITIES

Teaching Assistant – Applications of Information Technology, CCU 2025 – 2026

- Supported teaching, assessment, and grading; developed a Python tool to sample question banks and generate exam and answer files.

MATLAB Student Ambassador – MathWorks Sep. 2025 – Present

- Organized campus outreach and hands-on events; coordinated with TeraSoft and reported progress to the MathWorks ambassador program.

Vice Captain – Programming Contest Club, CCU 2026 – Present

- Coordinated activities, task assignments, officer transitions, and student outreach.

ADDITIONAL PROJECT EXPERIENCE

Information Technology Office, CCU – Technical Project Contributor 2026

- Co-developed a campus ISMS/PIMS AI agent with Microsoft Copilot Studio and Power Automate, including a knowledge base and Excel generation workflow.
- Supported testing and deployment troubleshooting; project advanced to the final round of the 2026 Microsoft Higher Education Agentic AI Copilot Hackathon.

HONORS & AWARDS

- **2026** – Government Entrepreneurship Grant (NT$160,000), EC-SOS Project.
- **2026** – Bronze Award, CCU Programming Contest, CS/EE Division.
- **2025** – Honorable Mention, CCU College of Science Poster Competition.

TECHNICAL SKILLS

- **Programming:** Python, C/C++, MATLAB, C#, Java.
- **ML / Computer Vision:** PyTorch, scikit-learn, ReID, object tracking, segmentation, metric learning.
- **AI / Software:** LLM integration, REST APIs, web scraping, NumPy, Pandas, Git/GitHub, Linux.

LANGUAGES

Mandarin Chinese: Native **English:** TOEIC 810
